MEMORANDUM: External Distribution of Radio Liberation Information Reports

1. Attached are copies of the regular distribution of information and research reports produced in Radio Liberation. Only external distribution is indicated and only that which is on a fairly regular basis. As far as news items go, the Radio Liberation news department works closely with VOA, RFE, UPI and other press services and consumers in Munich, including German radio. Items received at KUBARK which are marked with the letter "A" are sent to the U.S. Consulate in Munich by ☐ office and are not necessarily included in the attached lists, since this information is available at KUBARK.
2. No ACL materials are currently passed by MB to outside consumers in Munich to ☐ knowledge, although ☐ has access to files of correspondence and referenced materials maintained by MB. It has been agreed between ☐ that there is no necessity for his sending ACL materials to KUMONK, since this is handled in KUBARK by BGAFTRESS/Reports.
3. Items of no intelligence value have not been included in this list. Recipients mentioned for Audience Research Department are all in Audience Research sections of their respective organizations and normally reciprocate with similar materials addressed to Radio Liberation Audience Research.
4. As indicated by the attached lists and by an uncheckable amount of informal passing of materials to VOA and other local radio and press services by various individuals in ACL, there is little possibility of CS reporting from these sources other than whatever internal arrangement can be made to supply KUMONK on a regular basis. (Items included in the attached lists are known to be of interest to KUMONK staffers.)
5. ACL reports which appear qualified for CS interest will be specifically pointed out by ☐ along with such information. Past experience and the attached lists of external distribution appear to indicate minimal material of CS potential from ACL, however.

☐ ☐
